### 2030 Plan update survey

What will Georgetown look like in 2030? The City is updating the 2030 Plan, which acts as a guide to the City's growth and development decisions over the next 10 years. This will be your plan, so the community is encouraged to participate as much as possible throughout the process.

As part of our public outreach, we want to know what you love about Georgetown, and what you envision for the next 10 years. A brief survey is available at [2030.georgetown.org](http://2030.georgetown.org). The survey will be available throughout August and September. Don't miss your chance to share your thoughts!

The public is also invited to participate in a citywide public engagement effort on Tuesday, Oct. 2, to discuss their vision for Georgetown. More information will be available at [2030.georgetown.org](http://2030.georgetown.org).

### Sales tax election

#### STREET MAINTENANCE

A dedicated sales tax for street maintenance in Georgetown will be on the ballot for city residents in the Nov. 6 election. The sales tax generates more than \$3 million each year for street maintenance projects in the city.

Revenue from the 0.25 percent sales tax is used for maintenance and repair of city streets. This can include treatments such as surface seal, double-course surface treatment, and asphalt overlay.

The sales tax must be reauthorized by Georgetown voters every four years. The sales tax was approved in 2002 and was re-approved by the voters in 2006, 2010, and 2014.

The last day to register to vote for the November election is Oct. 9. Early in-person voting is Oct. 22–Nov. 2. Election Day is Nov. 6.

## #PICKTWO FOR LAWN WATERING

During the summer months, about 70 percent of the drinking water produced in Georgetown each day is used for lawn irrigation. The single biggest step you can take to conserve water is to move to a two-day or one-day per week watering schedule.

Check your watering days at [water.georgetown.org](http://water.georgetown.org) and #PickTwo watering days each week to save water. And remember #NoWateringMonday to give the water treatment, storage, and distribution system a day to recharge.
